ABOUT ME

Also known as pyTony the man behind Python MentorBank and the co-Founder of OceanSofty.com. I have a proven record of online learning, teaching, and self-taught ability; I believe one can say they know something only when they can teach it to the next person.

I am junior Data Scientist graduate from HyperionDev, self-taught software and web developer, I'm currently completing a Flutter course for Mobile app development, I was recently accepted in the Microverse global school for remote software developers, and I'm learning Ethical Hacking with Python to keep everybody safe
